

You do a great disservice to your country allowing any further consolidation of the media. It's a big, fat sellout. You know it, I know it, a lot more people than you will admit know it. The Constitution says the government is 'of, by, and for the People'. The word corporation is not even in the Constitution. I know that my opinion doesn't stand a chance when lined up against all the big media money that's been paid to those who are supposed to represent the public interest. This will not be forgotten. I predict in the long term, it will not stand. The people will demand a return to an independent media.
